CAREER OBJECTIVE

Computer Science Engineering student at RCOEM Nagpur with hands-on expertise in full-stack development, AI-integrated systems, and backend engineering. Delivered two production-grade projects using MERN stack, Django, and OpenAI API.. Seeking a Software Engineering role to build scalable, well-tested web systems in a collaborative product-driven environment.

EDUCATION

Shri Ramdeobaba College of Engineering and Management, Nagpur

2023 – Present

B.Tech in Computer Science Engineering | CGPA: 8.95

PROJECTS

ElevateAI – AI-Powered Placement Preparation & Interview Platform [Project Link](#) [GitHub](#)

[React.js](#) · [Node.js](#) · [Express.js](#) · [PostgreSQL](#) · [Tailwind CSS](#) · [OpenAI API](#)

- Architected a full-stack MERN + PostgreSQL SaaS platform featuring GPT-4-powered adaptive mock interviews, generating 20+ personalized technical and HR questions per candidate across 5+ engineering domains with real-time AI evaluation and detailed scoring feedback
- Engineered a resume parsing pipeline using OpenAI API for ATS score analysis and skill-gap identification; implemented PostgreSQL indexing and query optimization, reducing average API response time by ~35% under concurrent load across 15+ backend endpoints
- Designed an interactive readiness dashboard with progress tracking, weak-area insights, MCQ practice modules, and AI chatbot support; built community features including peer leaderboard and performance comparison using PostgreSQL aggregation queries
- Implemented JWT-based authentication with role-based access control, deployed on Render with environment-based config management; built a modern SaaS UI with responsive Tailwind CSS layouts optimized for mobile and desktop viewports

CityServe – City-Centric Local Marketplace Web Application [GitHub](#)

[Python](#) · [Django](#) · [HTML](#) · [Tailwind CSS](#) · [JavaScript](#) · [GSAP](#) · [SQLite](#)

- Engineered a multi-vendor local services marketplace using Django, supporting JWT-based authentication, role-based access control for buyers and vendors, product listing, cart management, and end-to-end order management across 5+ service categories
- Designed a normalized relational SQLite schema with Django ORM; implemented indexed full-text search and category filtering for efficient product discovery; exposed 12 RESTful API endpoints consumed by the JavaScript frontend
- Created a responsive UI using HTML, Tailwind CSS, JavaScript, and GSAP animations delivering sub-200ms interaction feedback; integrated search and filtering features improving product discovery and overall user experience across the platform

SKILLS

Programming Languages: Java, Python, C, JavaScript

Web Technologies: HTML, CSS, React.js, Node.js, Django, jQuery, RESTful API Development

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Machine Learning: Scikit-learn, NLP, Pandas, NumPy, OpenAI API, TF-IDF

Deep Learning: Neural Networks, CNN, RNN, Text Preprocessing, Tokenization

Tools: Git, GitHub, Docker (basic), Power BI, Figma

Core Concepts: Data Structures & Algorithms, OOP, DBMS

Soft Skills: Problem Solving, Learning Agility, Teamwork, Adaptability, Critical Thinking

VOLUNTEER EXPERIENCE

Creatives Head – Compusys (CSE Committee), RCOEM

[2025 – Present]

- Led creative design, promotions, and team coordination for technical and departmental events

Publicity Head – National Service Scheme & Red Ribbon Club, RCOEM

[2024 – Present]

- Managed publicity operations, volunteer coordination, and community outreach initiatives

ACHIEVEMENTS AND CERTIFICATIONS

- **Solved 350+ DSA problems on LeetCode**
- **Smart India Hackathon (SIH 2024)** — National-level government hackathon; built a full-stack solution under a 36-hour team sprint
- **400+ GitHub commits** across public repositories with active daily contribution graph
- **MERN Full Stack Developer** — EduSkills | **AWS Cloud Foundations** — AWS Academy
